PROJECTS

Pearl Streets :

📅 04/2025 - Present

Pearl Streets is a unified platform that connects users with professionals offering diverse services such as Food & Drink, Travel, Relaxation, Music, Art & Culture, and more. The platform supports three user roles—Super Admin, Professional Users (merchants), and End Users (customers)—to ensure smooth operations, service listings, bookings, and interactions.

Technologies: React.js, Next.js, MUI, HTML/CSS, REST APIs | Backend: Django REST Framework (Python)

- Developed and maintained the Professional User (Merchant) interface for managing services, reservations, and customer interactions.
- Built dynamic and responsive UI components using React.js, Next.js, and MUI, ensuring cross-device compatibility and accessibility.
- Integrated and consumed RESTful APIs provided by the backend team (Django DRF) for real-time data rendering.
- Implemented features like table reservations, dashboard analytics, order management, and status tracking.

AlgoSparks :

📅 09/2024 - 03/2025

A trading automation platform enabling traders to execute strategies seamlessly through third-party broker integrations. Clients can select brokers and trade with custom strategies via an intuitive user interface.

Technologies: React.js, Python (Django rest framework), postgresql , Bootstarp, WebSockets, REST APIs

- Designed and developed a dynamic, user-friendly frontend for a multi-user trading platform.
- Integrated third-party broker APIs (Dhan, Zerodha, Angel One, Alice Blue, Upstox) to facilitate seamless trading experiences.
- Implemented WebSockets to display real-time market data, including live Option Chain updates, Nifty & Bank Nifty data.
- Optimized UI performance and state management using Redux for a smooth trading experience.
- Deployed the frontend using pm2 for process management, ensuring high availability and stability.
- Ensured responsiveness and cross-browser compatibility for a seamless user experience across devices.

Labrador AI :

📅 09/2023 - 06/2024

Labrador AI is an all-in-one digital transformation platform designed for small and medium-sized businesses (SMBs), especially restaurants, offering services like websites, digital ordering, SMS marketing, VOIP, and POS systems to enhance guest experiences. It integrates with tools like DoorDash, and Google Maps for seamless operations while allowing businesses to adopt modern web and mobile technologies effortlessly.

Technologies: ReactJs, Javascript , Angular ,TypeScript, Tailwind Css, Python, Django, REST APIs, Scala

- Developed responsive and dynamic UI components using Angular to enhance user experience across web and mobile platforms.
- Implemented role-based authentication and authorization with JWT and email verification for secure access.
- Integrated DoorDash API to enable seamless food delivery services within the platform.
- Built custom dashboards and analytics interfaces, providing real-time insights for restaurant owners.
- Worked closely with backend teams to ensure seamless API integration and efficient data handling.

EXPERIENCE

Front End Developer

DigiPrima Technologies

🏢 Present 📍 Indore

Digiprima is a service based IT company.

- Designed and developed scalable, high-performance user interfaces using React.js and modern frontend technologies.
- Optimized application performance and ensured seamless API integration with backend services.
- Managed project builds, deployments, and CI/CD pipelines to streamline development workflows.
- Mentored junior developers and facilitated team collaboration using Agile methodologies.
- Collaborated cross-functionally with UI/UX designers and backend engineers to deliver intuitive and user-centric products.
- Implemented responsive design and accessibility best practices to ensure optimal user experience across all devices and compliance with WCAG standards.
